

Suicide Prevention Week Awareness and Outreach Activities at AIIMS Bibinagar

As a part of suicide prevention week the Department of Psychiatry, in collaboration with the College of Nursing, AIIMS Bibinagar, organized a series of meaningful and engaging activities. The initiative aimed to create awareness about suicide prevention, promote open conversations around mental health, and address the stigma associated with seeking psychological support. A diverse range of activities, including creative activities, gatekeeper training programmes, skits, and educational sessions, were conducted to engage students, healthcare professionals, and the wider community.
