

The Introduction Of E-Carts

The introduction of e-carts between the hospital building and AYUSH and the newly opened academic building by Dr. Ahanthem Santa Singh, Executive Director of AIIMS Bibinagar, is another step in bringing new services for patient welfare. Funded under the Swachh Bharat Abhiyaan initiative, these electric carts are designed to facilitate transportation for patients, staff and students ensuring their comfort and safety during transfers. The e-carts provide a clean, eco-friendly mode of transport, aligning with the principles of sustainability. They not only reduce the carbon footprint associated with traditional transport methods but also enhance the overall hospital environment by minimizing noise and air pollution. Patients, particularly those with mobility challenges, will greatly benefit from this service, as it offers a convenient and dignified means of navigating between the hospital and AYUSH building. Additionally, the e-carts can be utilized for transporting medical supplies, reducing delays and improving service delivery within the healthcare setting. This initiative exemplifies a commitment to improving healthcare infrastructure and patient experience while promoting cleanliness and environmental responsibility.
